

WRECKING BALL OFFICE DOLL

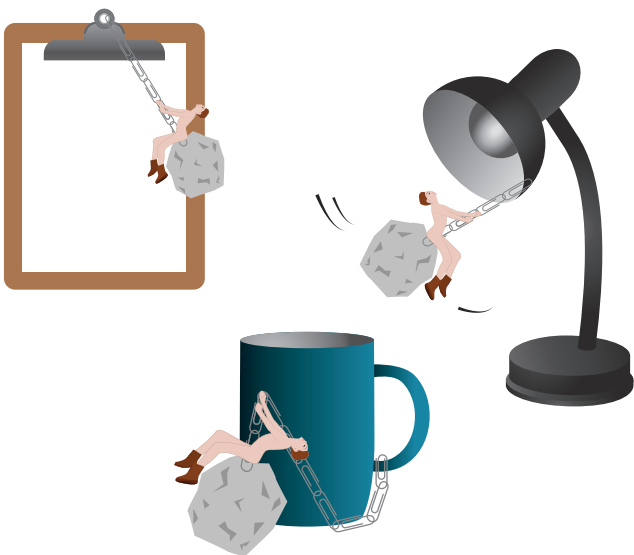

Create your own swinging doll that smashes through your co-workers cubicle and into their hearts. Everything you need is all ready in your office right now: paper, printer, paperclips, scissors, and tape!

2.) Create a paperclip chain by linking at least 8 paperclips together.

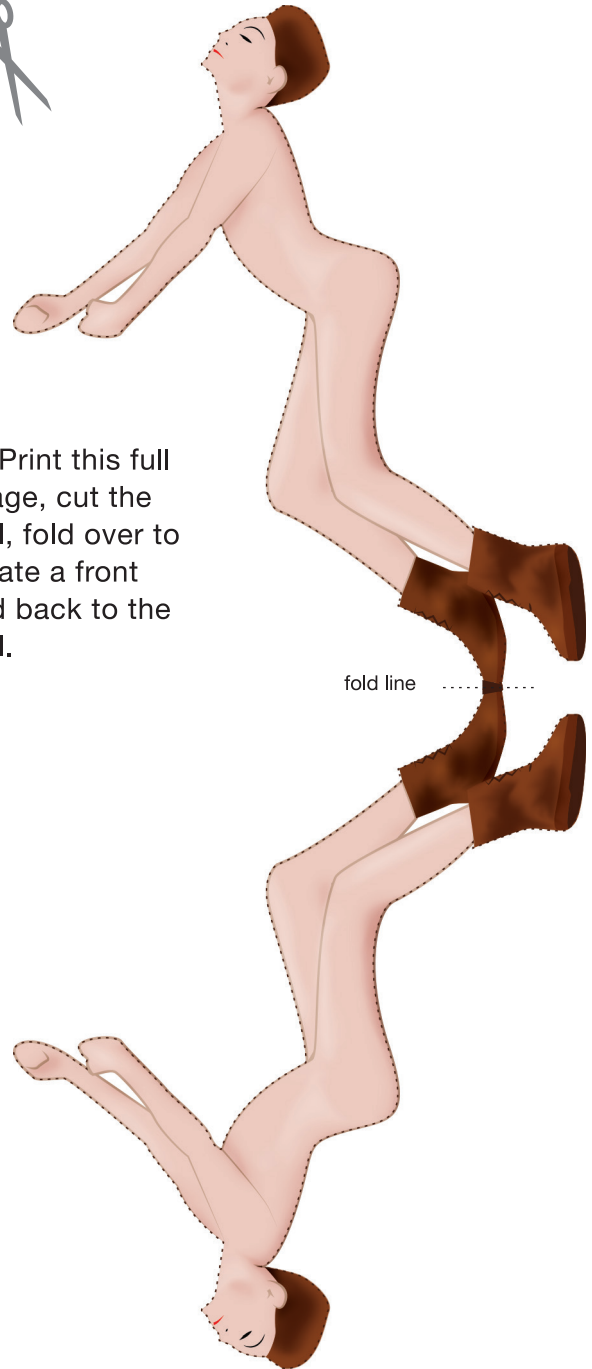

3.) Tape the cut-out doll to the second paperclip from the bottom.

4.) Tape the bottom paperclip to the paper ball you will create by crumbling the rest of this sheet of paper or you can use this morning's memo to make the wrecking ball.

1.) Print this full image, cut the doll, fold over to create a front and back to the doll.

fold line

To make it even more personal, cut out a person's face from your company's newsletter or print out the best photo your coworker has on their social media profile and tape it over of the doll's face. Then hang it from its paper clip chain around the office, ready for action!

WRECKING BALL OFFICE DOLL

So, you don't have anything for your doll to smash through? Well just print, cut, and tape these concrete cubes! Stack them up and knock them down!
